

The GAMIAN Conference, Larnaca/ Cyprus, 1st -3rd June 2012

Activities Delivering Hope, Empowerment & Success

To shape the future for people with schizophrenia

Ludger Hargarter
European Medical Affairs Director for Psychiatry
Janssen EMEA

The Janssen ADHES Project

Enhancing the quality of life of patients with schizophrenia through...

“With each relapse the person’s condition may deteriorate and previous levels of health and functioning may not be achieved”

(Johnson et al, 1983, Acta Psychiatrica Scandinavica)

“Those who stop medication are almost 5 times more likely to experience relapse than adherent patients”

(Robinson et al, 1999, American Journal of Psychiatry)

“Schizophrenia is one of the most challenging therapy areas for achieving adherence”

(Kane, 2006, Journal of Clinical Psychiatry)

Functioning

Part 1

The Functioning Initiative

The Functioning Initiative - Objectives

Functioning

The main objectives of this initiative are to:

1. Ascertain opinions and perceptions of psychiatrists regarding the clinical importance, assessment and management of social functioning in patients with schizophrenia
2. Design activities and tools, applicable to everyday clinical practice, to assess, address and manage social functioning in patients with schizophrenia
3. Prepare materials and deliverables helping to continuously improve the treatment and lives of patients with schizophrenia

The Functioning Survey*

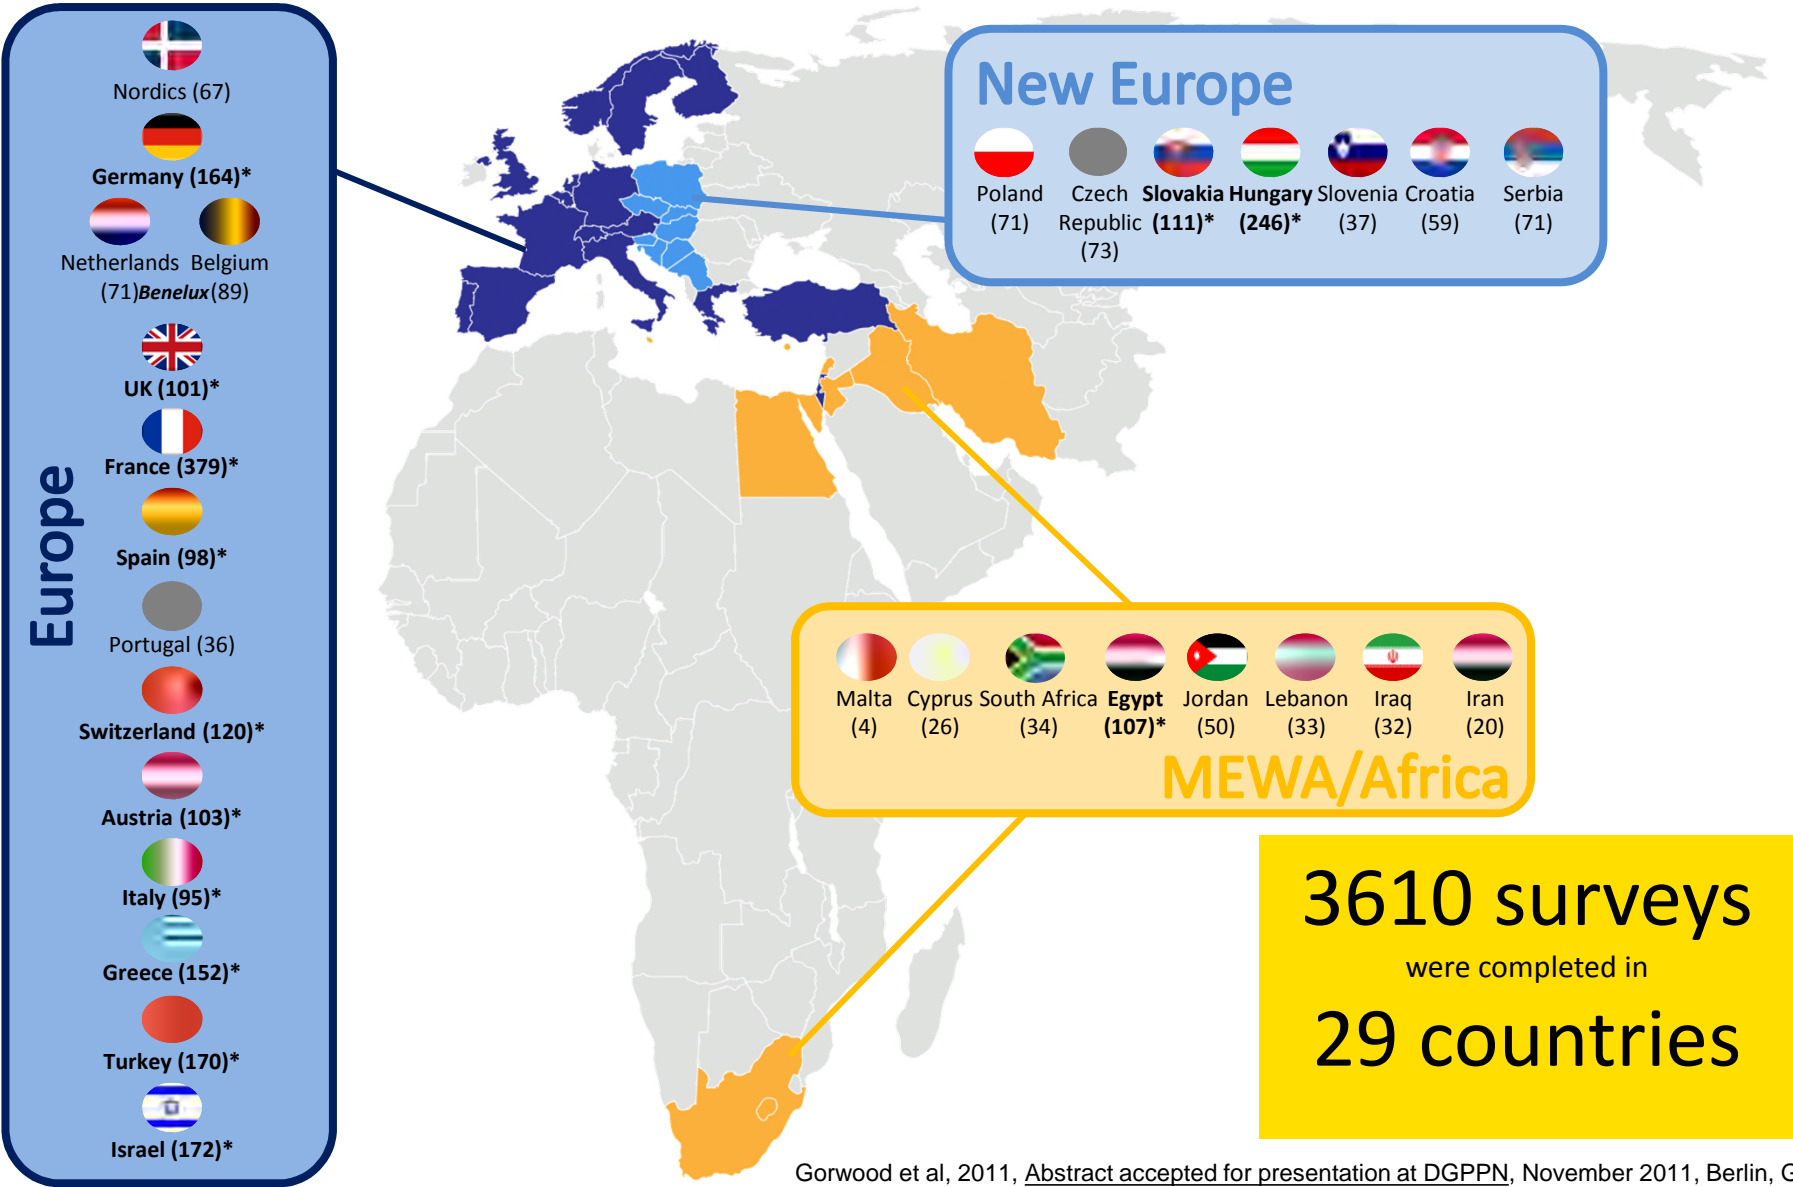

Who?	When?	Where?
3610 Psychiatrists	March – April 2011	EMEA (Europe, Middle East, Africa)

*Gorwood et al, 2011, [Abstract presented at DGPPN](#), November 2011, Berlin, Germany

Functioning Survey – The Sample

Functioning

Gorwood et al, 2011, Abstract accepted for presentation at DGPPN, November 2011, Berlin, Germany

*Country results are shown if >100 surveys were completed (incl. Italy and Spain)

Part 2

Adherence

The ADHES Initiative - Objectives

The EMEA ADHES Initiative is an international initiative, which aims to raise awareness of the importance of continuous medication in schizophrenia and the problems of non/partial adherence

The main objectives of this initiative are to:

1. Assess the real situation of adherence to treatment of patients with schizophrenia
 - Understanding the size of the problem
 - Realising the effects of non-adherence in schizophrenia
 - Identifying the causes of adherence issues

The ADHES Surveys

Who?	When?	Where?
4722 Psychiatrists ^{1,2,3}	Jan – Mar 2010	EMEA
4120 Nurses ⁴	Jan – Mar 2011	EMEA
138 Carers ⁵	Jan – Apr 2011	Europe

2. Uncover main challenges for treatment adherence in schizophrenia
 - Assessment and management of adherence

3. Design activities to improve adherence
